

Check-in and Muster Deadlines

Pelorus Voyages · Voyage Operations · Card VO-12 · Rev. 3, June 2042

Keep this card with your boarding documents.

All times are minutes **before the published departure window opening**. Missing the muster deadline closes the manifest. The vessel will not hold.

Stop	Deadline	Muster point	Notes
Earth Launch Terminal	180 min	Terminal 7, Gate 22	Baggage drop by 4 hours before departure. Biometric check-in opens 6 hours prior. Pre-departure health check with Pelorus Voyages staff at Terminal 7, Medical Suite B, within the 72 hours before departure.
Moon Base 7 — IPS / ORT transit	90 min	Bay 3 Airlock, Level B	Surface excursions ended and suits returned before entering Bay 3. Equipment drop-off adds 15 min.
Moon Base 7 — GST extended layover	90 min	Bay 3 Airlock, Level B	Last Golf Links tee time no later than 2 hours before muster. Rover tour back at least 2 hours before muster.
Mars Colony 1	60 min	MC-1 Airlock Bay B, Hab Ring 2	EVA suits returned and docked before entering Airlock Bay B. Suit return takes 10–15 min.
Venus — The Aphrodite	30 min	Docking Pier 1, Resort Deck 2	Pool and sun deck close 45 min before departure. Final glass floor group exits by 60 min. Gondola operator's cutoff: 90 min before departure.
Ceres Waystation	45 min	Waystation Hub Central, Dock 4	Tether lines returned and logged before entering the hub; tether return adds 10 min. The Leap platform closes 60 min before departure.

Saturn Ring Transit	N/A	No surface stop	Observation deck closes 30 min before ring exit burn. No disembarkation.
Titan Ice Flats	75 min	Excursion Base Alpha, Airlock 2	Cold-suit decontamination is mandatory and takes about 20 min. Be back 95 min before departure. Return ice sports equipment before decontamination.
Enceladus Geyser Flyover	N/A	No surface stop	Observation deck viewing only. Window cleaning begins 60 min after closest approach; visibility may be restricted.

Remember

Titan: 95, not 75. The posted muster is 75 minutes. Decontamination takes 20 more. Your real return time from the surface is 95 minutes before the departure window.

Ceres: The Leap closes first. The platform closes 60 minutes before the departure window — 15 minutes ahead of the 45-minute general muster. Finish The Leap by 60.

Venus gondola. Docking and securing take 30 to 40 minutes after the ascent. The operator enforces the 90-minute cutoff independently and will not extend it.

Moon Base 7 golf. Book a morning round (starting 0700–1100) on the GST layover. Afternoon rounds leave thin muster margins.

Build in a buffer. Aim to be back 30 minutes before the muster deadline, not at it.

Muster is not boarding. Reaching the muster point on time puts you on the manifest. Boarding then follows in order. Arrive with fewer than 20 minutes left before the departure window and you may not board before the airlock seals.

If you miss the muster

The vessel departs without you. Go straight to the Pelorus Voyages expedition coordinator at the stop. Coordinator posts stay staffed for four hours after each departure.
